Contact: 8358946074

Professional Summary:

VisionPLUS Developer with **8 years of experience** in the Banking (Credit Cards) domain, working extensively on VisionPLUS Mainframe, COBOL, JCL, CICS, VSAM, and related subsystems (CMS, FAS, LMS).

Equipped with formal, hands-on training in **Python, Generative AI, Agentic AI, LangChain, LangGraph, and RAG**, and actively transitioning into an **AI Engineer role**, combining modern AI capabilities with **extensive enterprise experience in Cards & Payments, VisionPLUS.**
Built **end-to-end AI systems** capstone project demonstrating multi-agent orchestration, RAG-based retrieval, real-time data integration, and human-in-the-loop governance.

CAREER OBJECTIVE:

To transition into an **AI Engineer role**, leveraging deep VisionPLUS banking expertise with **Python, LangChain, LangGraph, and RAG** to build secure, scalable, and enterprise-ready AI solutions.

Technical Skills:

- Generative AI, Agentic AI
- LangChain, LangGraph
- RAG (Embeddings, Vector DB, Retrieval Pipelines)
- Prompt Engineering, Multi-Agent Orchestration

Programming & Tools

- Python (AI & Automation)
- COBOL, JCL
- Git, Jupiter Notebook

Banking Domain

- VisionPLUS
- Modules: CMS, FAS, LMS

Delivery & Methodologies

- Agile / Scrum, SDLC
- Requirement Analysis, Technical Design
- Unit Testing, SIT, UAT Support, Production Support

Professional EXPERIENCE:

Virtusa Consulting Services — Lead Software Engineer

July 2022 – Present

- Lead VisionPLUS development for global banking clients (LATAM).
- Delivered end-to-end enhancements: requirements → design → coding → testing → deployment.

- Ensured reliability of high-volume card processing systems.
- Applied learning from Python, GenAI, LangChain, and RAG to explore AI-based automation for capstone project.

Capgemini — Consultant

April 2021 – July 2022

- Implemented VisionPLUS enhancements and regulatory changes.
- Managed critical production incidents and system debugging.
- Worked in Agile delivery model with distributed teams.

ATTRA Infotech — Senior Software Engineer

July 2017 – March 2021

- Delivered multiple VisionPLUS implementations for global clients.
- Built deep expertise in COBOL, JCL, CMS, FAS, and LMS.
- Recognized multiple times for high performance and client impact.

AI PROJECT DETAILS:

Academic Paper Review — Multi-Agent GenAI System

Objective:

Designed an Agentic AI-based multi-agent system to automatically analyze and evaluate academic research papers.

Key Contributions

- Designed an **end-to-end multi-agent architecture** using **LangGraph** with clearly defined states, transitions, and orchestration logic.
- Built **modular analysers** that could operate independently or in a pipeline, improving scalability and reusability.
- Designed structured prompts for each agent to ensure consistent, explainable, and high-quality outputs.
- Implemented **error handling and fallback mechanisms** when retrieved context was insufficient.

Tech Stack: Python, GenAI, LangChan, LangGraph

Education Intelligence Agent — Personalized Learning System

Objective:

Developed an **AI-driven multi-agent education system** to personalize learning, track progress, and recommend content based on student performance.

Key Contributions

- Designed a **human-in-the-loop Agentic AI architecture** to ensure governance, trust, and oversight.
- Implemented an **Orchestrator Agent** to dynamically route tasks to appropriate agents based on learner context.
- Integrated **feedback loop mechanism** so system recommendations improved over time based on user responses.
- Designed approval workflows for high-stakes decisions using an **Approval Manager agent**.
- Integrated feedback loops for continuous learning improvement.

Tech Stack: Python, GenAI, LangChain

Stock Market Intelligence System — RAG

Objective:
Built a **RAG-based Stock Market Intelligence Agent** that retrieves real-time market data using **Tavily search** and answers user queries with grounded, context-aware insights.

Key Contributions

- Designed an end-to-end **RAG pipeline** combining live web search.
- Integrated **Tavily** for real-time market news, trends, and sentiment retrieval.
- Implemented vector embeddings for efficient semantic retrieval.
- Built a conversational GenAI layer
- Added citation-backed responses to improve transparency and trust.

Tech Stack: Python, GenAI, LangChain, RAG, Tavily API

BANKING PROJECT DETAILS:

1. **Global Credit Limit Utilization**

Description	Fichosa Client wanted grant more credit limit for authorization by enabling customers to use relationship level credit limit.
Role	Developer
Responsibilities	-Handled projects from requirements analysis to system study, coding, testing. -Performed Unit Testing and SIT.
Skill utilized	Vision Plus, Cobol, CMS, FAS, CICS

2. **Cashback points accumulation based on Store Description and MCC**

Description	Fichosa Client wanted to modify the logic for cashback points posting program to grant points to customer based on Store description and MCC.
Role	Developer
Responsibilities	-Handled projects from requirements analysis to system study, coding, testing. -Performed Unit Testing and SIT.
Skill utilized	Vision Plus, Cobol, LMS, CICS

3. **Criteria B-6:**

Description	Banorte Client wanted to introduce a new screen to display cycle due and related fields on that screen.
Role	Developer
Responsibilities	-Handled projects from requirements analysis to system study, coding, testing. -Performed Unit Testing and SIT.
Skill utilized	Vision Plus, Cobol, CMS, CICS

4. **Credit Limit Usage Restriction:**

Description	IMEA client wanted to restrict the usage of credit limit to a particular limit in Vision Plus System.
Role	Developer
Responsibilities	-Handled projects end-to-end from requirements analysis to system study, coding, testing and implementation and debugging. -Documentation and Reporting from Functional Phase to implementation phase. -Performed Unit Testing and SIT. -Provide production support during project implementation.
Skill utilized	Vision Plus, Cobol, CMS, FAS

ACADEMIC PROFILE:

CLASS/COURSE	NAME OF THE INSTITUTION	BOARD OF STUDY	YEAR OF PASSING	MARKS(%)/ CGPA
BTECH (EC)	Acropolis Institute of Technology & Research, Indore	RGPV	2017	78.2
XII	St. Joseph Convent Sr. Sec. School, Ratlam	CBSE	2013	83.6
X	St. Joseph Convent Sr. Sec. School, Ratlam	CBSE	2011	9.0

PROFESSIONAL/ACADEMIC ACHIEVEMENTS:

1. Awarded with STAR performer award in Virtusa as recognition to my work
2. Awarded with Top Performer Bonus for 3 consecutive years in recognition to my work
3. Won 3 times spot award in ATTRA as recognition to my work.
4. Won Rising Star Award in ATTRA as recognition to my work.
5. Won Value Creator Award in Capgemini as recognition to my work.

EXTRA-CURRICULAR ACTIVITIES:

1. Part of the ATTRA TAB Team
2. Part of Network Tab Team
3. Part of Buddy Program in Capgemini.
4. Part of the ATTRA Emergency Response Team.

CERTIFICATIONS:

1. Generative AI & Agentic AI Training
2. Python for AI and Automation
3. Fresher Learning Program in Mainframes (COBOL, JCL)
4. Agile Methodology Certification from Coursera.
